The revolution in

# ASPARAGUS FILMS

It is about the first modern asparagus film, thought-out by and for growers and manufactured with the most modern technology by **reyenvas**.

## Advantages

### Optimal workforce planning

When the first bars become visible under the mulch, you can wait another week before starting the recollection work. The harvesting staff works with high kilo output from day one.

### Less open heads

### Almost no rust

### Almost no blue heads

### Reduced harvesting costs

It is only harvested every few days.

**Up to 8 days  
from one harvest  
to the next!**

### Thicker bars

### Snow-white asparagus

AA1 Super Extra White.

### Lower picking costs

Lower picking costs due to increased recollection capacity (2-3 times).
