

# Reyroll technical datasheet

## DESCRIPTION

Hook for vertical climbing of tomato, cucumber, and pepper plants, among others. Composed of a reel on which is wound the raffia (PP or biocompostable) that will be used for the vertical climbing of the plant, and a hook (PP recycled with UV protection) that will serve as a container for the reel and that will be fastened on the horizontal twine. Suitable for twine wire from 2mm to 6mm.

Reyroll has a double hook design which allows that it doesn't slide unintentionally laterally on the wire. Its design facilitates quick installation and operation, with a lowering system with secure locking. The hook is made of recycled material with UV protection that provides long durability, and once its useful life is over, it can be recycled. Reyroll is valid for both high and low trellising.

### KIT TECHNICAL SPECIFICATIONS (REEL PP)

MATERIAL	Recycled PP with UV protection
UNIT WEIGHT	26 grams + twine weight
TWINE LENGHT	From 12 until 36 meters*
TWINE RUNNAGE	1000 m/kg and 1200 m/kg
COLOUR	Black and White

\*Consult the different available alternatives depending on the twine type

### BIOTUTOR TECHNICAL SPECIFICATIONS

MATERIAL	Recycled PP with UV protection
UNIT WEIGHT	26 grams + twine weight
TWINE LENGHT	From 12 until 25 meters*
TWINE RUNNAGE	Flat 550 m/kg and 700 m/kg
COLOUR	Black and Naturel

\*Consult the different available alternatives depending on the twine type

## CUBING

	HOOK	REEL	KIT
Units per-box	300 units	300 units	300 units
Units per-pallet	7.500 units	15.000 units	7.500 units
